

iScanner

Q&A about the iScanner app

(iOS/Android/Website/Images/Video)

What is iScanner?

- ✓ iScanner is a US-based **#1** scanning and document management platform and has over 80 million downloads and an average App Store rating of ★4.8/5

It helps people to get **superior quality scans with no effort**

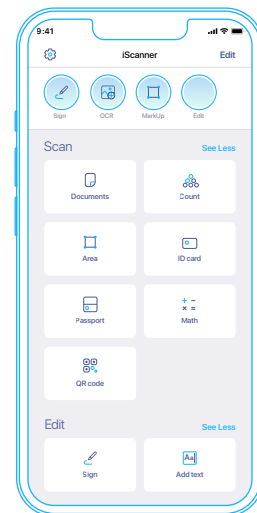

- ✓ AI-powered
- ✓ Ad-free
- ✓ Smooth
- ✓ Reliable
- ✓ Sustainable

The main functions of the app include:

- Scanning documents, plastic cards, and passports with a camera or by uploading an image from the device. The app's neural network automatically determines the exact borders of the document, corrects distortions caused by tilting, and processes colors of the scan.
- Adding a signature to a document or transferring a stamp from any other image.
- Highlighting and adding text to a scan.
- Extracting text from an image to copy or edit it.
- Counting identical objects in a photo.
- Solving mathematical equations.
- Measuring area and distance.

What year was iScanner iOS released?

Worldwide Release Date:

09/23/2015

Who develops the iScanner app and why?

The iScanner app was developed by the US office of BP Mobile ([AIBY GROUP](#)).

We are a team of professionals with a strong desire to give people confidence in dealing with documents. We aim to make it possible for everyone to create PRO documents having smooth experience.

Having worked on the app since 2015, we have been sparing no effort to keep track of the latest trends and provide our users with the best experience possible and immaculate product quality.

We have developed iScanner hoping that it will help implement paperless processes, increase mobility, save time, eliminate the need to go to the office to sign a document and use mail and fax.
