# SHOP SMALL

Support iScanner community

*#SmallBusinessSaturday*

# Hi there, PDF enthusiasts!

November 25th is #SmallBusinessSaturday, an annual event created to encourage shopping locally, both in person and online, at small businesses.

*Join in! Let's find partners, services, and friends! Happy shopping small!*

*iScanner Team*

## Why is it important?

- Supporting the Local Economy: By shopping at small businesses, you're reinvesting your money directly into your community.
- Environmental Impact: Small businesses often have a smaller environmental footprint compared to larger corporations.

## What's in it for you?

- Personalized Service: Owners and staff have a deep understanding of their products or services and can offer tailored recommendations to meet your specific needs.
- Unique and Diverse Offerings: Small businesses often offer unique and locally crafted products or services that you might not find at larger chain stores.

## Why is iScanner in?

Over 40% of iScanner's users are small businesses and freelancers who don't have access to corporate software but rely on us for perfect professional documentation. Supporting businesses is our duty, and we aim to do more.

## What do we commit to?

Starting this November and continuing onward, we are committed to gathering a list of great small businesses owned by our users to promote them throughout the year to our vast iScanner community.

## **DILES CONSULTING**

Consulting and expert witness services  
to broker-dealers and investment advisers

[colleen@dilesconsulting.com](mailto:colleen@dilesconsulting.com)

Los Angeles, US

Last year, following a 25-year career in the securities industry, including 22 years at the Financial Industry Regulatory Authority (FINRA), I established my own compliance consulting firm called Diles Consulting. I assist broker-dealer and registered investment adviser clients with regulatory issues, inquiries, and compliance. I offer expert consulting and testimony services, independent reviews, compliance support, and the completion and filing of FINRA membership applications.

Motivation, discipline, and flexibility are key requirements for running a small business. At the beginning of each day, I take a few minutes to reflect on completed tasks and assess whether adjustments can be made to improve the process for next time. Being mindful of adjustments that you can make to better your business in real-time or close to real-time can improve your processes, efficiency, and productivity

Signing contracts and engaging clients is essential to my business, and iScanner allows me to execute an agreement, PDF it, and send it to my clients. It is quick and efficient, which saves me time

**Coleen Diles, President of Diles Consulting**

# Media, Entertainment, & Visual Arts
